EnerDel announces supply agreement with Toro for the Greensmaster® eFlex™ Walk Greensmower

All-electric, lithium-ion-powered models mow up to 9 greens on a single charge

Indianapolis – 3/30/16

– EnerDel’s advanced lithium-ion products and task-oriented solutions continue to gain interest as the company secures a multi-year supply agreement for its battery modules, to be used in Toro’s Greensmaster® eFlex™ walk greensmower.

The eFlex™ greensmower was the industry’s first lithium-ion-powered, all electric model of its kind. The lithium ion battery provides enough power to consistently mow up to nine average greens* on a single charge – a breakthrough in the category. Since it is battery powered, there is no fuel or oil to change, resulting in no leaks, zero emissions and minimal maintenance. The mower is also extremely quiet, allowing maintenance crews to be on the course earlier and double-cut before players are on the course.

Toro Greensmaster® eFlex™ Walk Greensmower

“We are extremely excited to secure this agreement with Toro and to continue what has been a very meaningful long term relationship. Our “Task Oriented Solutions” business platform is a wonderful complement to our rapidly expanding Hybrid Bus and Mobile Hybrid Power business platforms. We continue to deliver on an aggressive business plan, and furthering relationships with innovative, industry leading organizations like The Toro Company are integral to our continued success,” said Jim Bowman, EnerDel’s Vice President of Operations.
